

GRACE PENDO

Nairobi, Kenya | Business Intelligence & Financial Analyst Portfolio

Professional Profile

Analytical and detail-oriented student specializing in **Strategic Financial Auditing** and **Inventory Optimization**. Proven ability to identify "Dead Stock," manage liquidity crises, and reallocate budgets to drive growth. Skilled in turning complex data into actionable executive dashboards.

Core Technical Skills

- **Data Modeling:** Budget Forecasting, Reallocation Strategy, Risk Mitigation, "IF" Logic.
- **Software:** Microsoft Excel (Pivot Tables, Trend Analysis), Canva (Data Visualization), Python, Streamlit Framework.
- **Business Logic:** ROI Calculation, Inventory Turnover, Profit Margin Optimization.

Business Intelligence Projects

1. Digital Logistics Management – Smart Kitchen Tool

- **Problem:** Manual tracking of food portions and kitchen ingredients leading to unoptimized resource allocation and operational blind spots.
- **Action:** Programmed, documented, and deployed a custom digital management platform using **Streamlit** and **Python** to track and manage food portions and inventory logistics.
- **Result:** Successfully automated real-time resource tracking and hosted the live application via GitHub for continuous operational availability (grace-pendo-ai.streamlit.app).

2. Strategic Audit – Nairobi Tech & Accessories

- **Problem:** 40% of capital trapped in non-performing "Dead Stock" (Gaming Headphones).

- **Action:** Executed a **Ksh 50,000 reallocation**, cutting underperforming stock and reinvesting Ksh 30,000 into high-demand inventory.
- **Result:** Established a Ksh 10,000 Emergency Fund and launched a dual-channel marketing strategy to increase daily cash flow.

3. Financial Recovery – Nairobi Lions Basketball Academy

- **Problem:** Budget deficit of Ksh 20,000 threatening operations and player retention.
- **Action:** Audited operations to identify Ksh 23,000 in non-essential spending.
- **Result:** Secured a critical player's position, maintained a **Ksh 3,000 surplus**, and ensured 100% budget compliance.

4. Profit Margin & Retail Strategy Audit

- **Problem:** Low net profit due to unoptimized product mix and pricing in a high-volume retail environment.
- **Action:** Analyzed "Loss Leaders" vs. "High-Margin Drivers" and implemented a "Price Anchor" strategy.
- **Result:** Achieved a **23.5% average profit margin** while maintaining customer loyalty and foot traffic.

5. Inventory & Cash Flow Optimization Audit

- **Problem:** Severe liquidity crisis with 50% of capital frozen in stagnant assets.
- **Action:** Applied "Inventory Turnover" principles to recover 30,000 Ksh in operational capital.
- **Result:** Pivoted business model to high-velocity items, reducing "Dead Stock" exposure by **80%**.
